Motivated and detail-oriented Full Stack Developer with a foundation in Java, Spring Boot, MySQL and React. Interested in building reliable, user-friendly web applications, writing clean code and continuously improving technical skills. Comfortable collaborating with a team, learning new tools and solving problems through a structured approach.

TECHNICAL SKILLS

Programming	Java, JavaScript, HTML5, CSS3
Backend	Spring Boot, Spring MVC, REST APIs
Frontend	React, JSX, Bootstrap
Database & Tools	MySQL, Git, GitHub, Postman, IntelliJ IDEA

PROJECT EXPERIENCE

Job Portal Web Application | Full Stack Developer

Academic Project | Jan 2026 – Apr 2026

• Developed a job portal interface that supports job seeker and employer workflows.
• Built responsive React pages for profile management, job listings and applications.
• Implemented REST API endpoints using Java and Spring Boot, with MySQL for persistent data.
• Tested API requests and responses using Postman and used Git for source control.

Personal Portfolio Website | Frontend Developer

Practice Project | Oct 2025 – Dec 2025

• Created a responsive portfolio website to present technical skills, projects and contact information.
• Used React, JavaScript, HTML and CSS to build reusable components and interactive sections.
• Improved layout consistency and usability across desktop and mobile screen sizes.
